FDA Food Contact Compliance Review of Versatex Building Products LLC.'s Signboard and Trimboard

Prepared by: Nick Jermstad, Manager of Toxicology & Environmental Assessment

Date: June 23, 2016

Introduction

Versatex Building Products LLC. (“Versatex”) has requested an FDA food contact compliance review of its signboard that may be used in a food facility. The product would be used as signboard or display board in the graphics market.

Intertek completed a FDA review of the components of the signboard. Where a full composition was not available, supplier statements and/or safety data was applied.

Conclusions

Based on the FDA compliance of the components and raw materials, all substances are FDA compliant in compliance with FDA food contact regulations as outlined in 21 CFR 174.5; *General provisions applicable to indirect food additives*, which includes FDA Incidental Food Contact.
